

Viewing a mobile app without an emulator

**** These instructions require the APKOnline chrome extension. Once installed, you can view the link within chrome and utilize the extension via the instructions below.**

Navigate to this link (using Chrome):

<https://github.com/sourkrouse/ePortfolio/blob/main/WeightTrackerApp/app-debug.apk>

Open the extension “APKOnline”

The extension should detect the APK file:

ApkOnline integration

☒ Detect enabled

[Files detected](#)

[Run Emulator](#)

[File Manager](#)

APK files:

(Click and use the filemanager to run the APK with the Android emulator)

File : <https://github.com/sourkrouse/ePortfolio/commits/main/WeightTrackerApp/app-debug.apk>

File : <https://github.com/sourkrouse/ePortfolio/commits/main/WeightTrackerApp/app-debug.apk>

File : <https://github.com/sourkrouse/ePortfolio/raw/main/WeightTrackerApp/app-debug.apk>

File : <https://github.com/sourkrouse/ePortfolio/raw/main/WeightTrackerApp/app-debug.apk>

Other kind of files:

(Click and use the filemanager to import the files inside the Android emulator)

My ApkOnline username: uj5nmz06mw

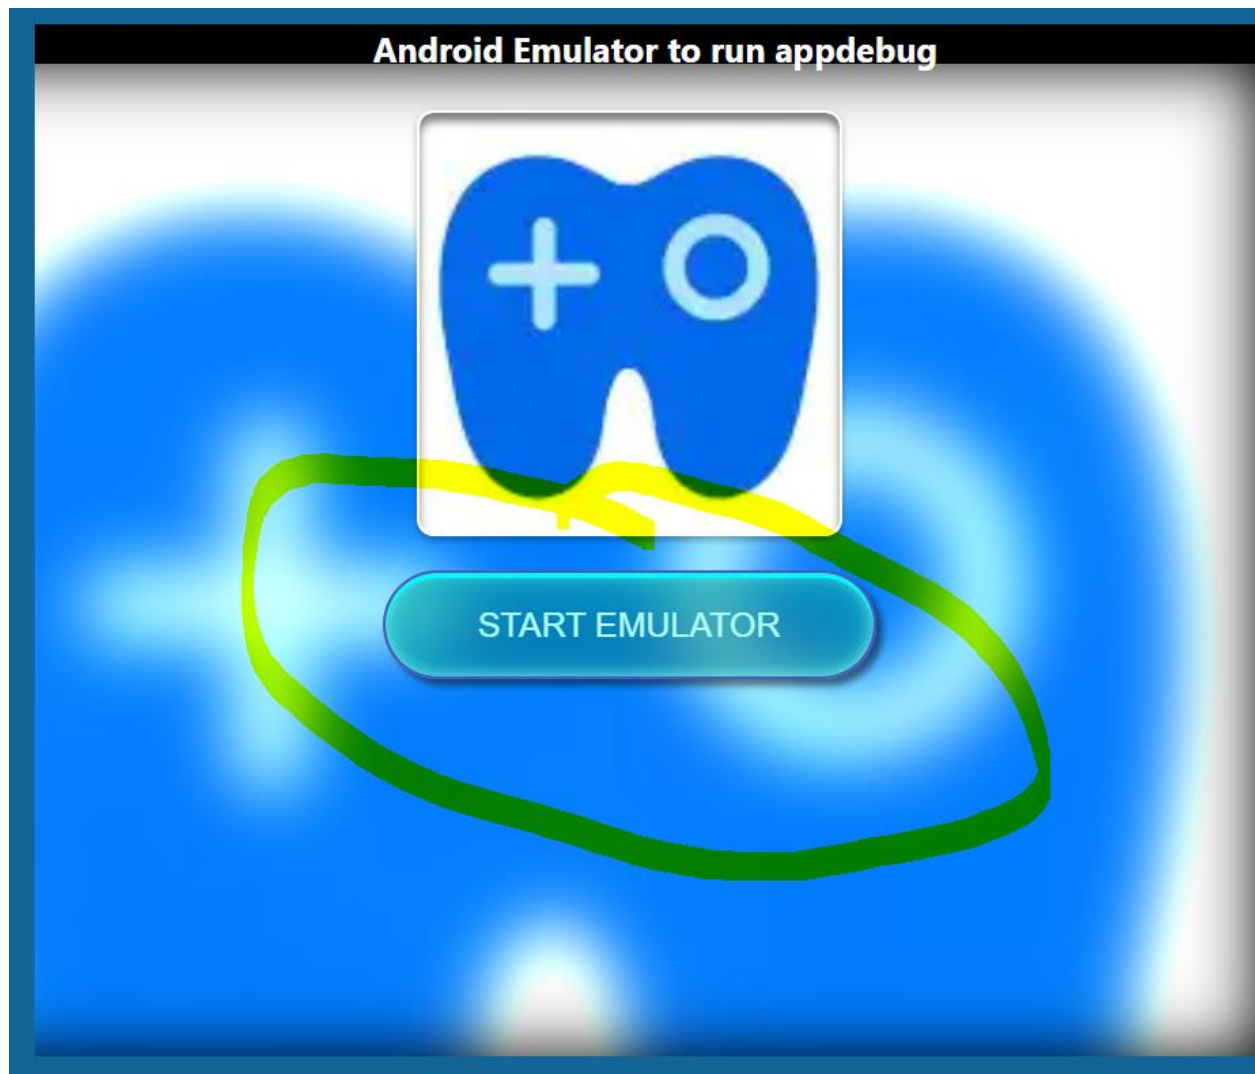

IMPORTANT: This extension collects your browsed URLs in our servers in order to detect APK and other files that could be run or managed by our Android emulator file manager.

Click the “>Run_APK” link

Filename		Size	
^ [up]			
 app-debug.apk		208.41 KB	>Run_APK
appdebug.apk		11.36 MB	>Run_APK
Click the bottom to Upload an APK to be run with our emulator			
User: uj5nmz06mw			

Click “Start Emulator”

Then click “Enter” after the emulator starts

Result – the app should be interactive

Exit
